Your benefits

Saving of time

Thanks to the intuitive handling of the ecommerceDB, you can quickly find the most important KPIs. Analyze the online stores of your competitors and use our market forecasts for your future business decisions. Save time, costs, and resources.

User-friendliness

The clear structure of the platform makes the database easy to use, providing fast results. The data can be downloaded in XLS format and directly integrated into your work. The in-house analysis service offers you the opportunity to direct your individual research topics at our professional analyst team, thus saving you a considerable amount of resources.

High-quality data

All data has been verified by our experienced analysts multiple times. Thanks to our extensive cooperation with the EHI Retail Institute, you get exclusive insights and studies related to the topic of eCommerce. All data is transparent and comparable.
